

Quick Reference Guide

Artificial Intelligence: Preparing Your Career for AI

1. Educate Yourself About AI

- Learn the basics of AI
- Choose your objective with AI
- Get the right training for your objective
- Practice your skills until you are confident
- Choose reliable sources of information

2. Upgrade Your Career for AI

- Determine if your job is at risk of automation
- Decide if your company is at risk of becoming obsolete
- Choose a career AI path (e.g. AI trainer, developer, tool user, etc.)
- Get into the AI value stream or the ecosystem built on top of AI
- Focus on the human aspects of your job

3. Invest in an AI-first Economy

- Invest in yourself first (education + career)
- Invest in AI solutions to real-world problems
- Don't depend solely on your labor for income
- Invest in the economy as a whole using index funds
- Invest early for compound growth over time

4. Use AI Responsibly and Ethically

- Ask the difficult questions now
- Avoid bias in your AI models
- Provide transparency in your AI decisions
- Protect your private data from abuse
- Demand more from our political and corporate leaders

5. Adapt to What Comes Next

- Embrace change rather than fight it
- Be skeptical... but not too skeptical
- Keep an open mind to new ideas
- Pick your battles wisely
- Be mindful – to peacefully coexist with our technology
